

INTERNATIONAL ADOPTION PEDIATRICIAN REVIEW

Family Name _____ Country Adopting From _____

Child's Name _____

All God's Children International (AGCI) requires adoptive parents to consult with an international adoption specializing pediatrician regarding the referred child and have all child documents and other child information reviewed by such a specialist. AGCI is unable to accept an evaluation issued by a general pediatrician or family physician.

These doctors are experts at reviewing international medical information and are available to families when they are with their child in-country. International pediatricians understand this is a time sensitive matter. There is a list of international adoption specializing pediatricians on the portal. AGCI in no way endorses or guarantees the services of any of the persons or entities listed. AGCI will make reasonable efforts to answer additional questions on medical and social information.

A copy of the international adoption specializing pediatrician's full written report must be attached to this form and returned to AGCI with all other referral documents.

I/We understand that AGCI has provided all medical and social information that was made available to the agency. I/We also understand that AGCI cannot guarantee the completeness or accuracy of child referral medical and social information. I/We understand that for any reason, prior to finalization, we can choose not to move forward with this adoption.
